Susquehannock Wildlife Society is a 501(c)(3) non-profit dedicated to protecting local wildlife

*"Research. Conservation. Education. Rescue/Rehabilitation."*

### The Cost of Rehabilitation

	Weekly	Total
One Squirrel	\$20	\$250
One Opossum	\$35	\$280
One Rabbit	\$10	\$80
One Snake	\$5-10	\$20-40
One Turtle	\$20	\$300-500
One Groundhog	\$35	\$280
One Chipmunk	\$20	\$250
One Mouse	\$10	\$75
One Toad/Frog	\$10	\$50

- These costs are an estimate for care from a baby to release.
- The costs of a turtle varies greatly because they come to us injured from mowing and hit by car accidents. Therefore, antibiotics and medical treatments can last for quite some time. The more severely injured can take up to 2 years to heal before release.
- Snakes, toads and frogs also come to us injured and require medical care.
